

Summary of Farren Lake Property Owners' Survey – Lake Management Plan

Overview: Farren Lake is a small, spring fed lake with 130 cottages. It has a relatively short history of cottaging <50 years. It is predominantly a “summer cottage” lake with few permanent, year round residents. The broad consensus from the survey is for:

- Conservation of the natural heritage, in particular, the quality of the water;
- Peaceful enjoyment; and
- Respectful use of the water and surroundings

In summary: low key, low tech, low noise and low impact on the peace, tranquility, natural environment and shared space. (note: 69.2% response rate.)
